7. (Amended) The case according to Claim 1, wherein a predetermine number of clock pulses after the electroluminescent laminate emits the light, the control unit disconnects the power supply from the electroluminescent laminate.

8. (Amended) The case according to Claim 1, wherein the pattern is a logo.

9. (Amended) The case according to Claim 1, wherein the pattern is a pattern of at least one of an animal or a cartoon character.

10. (Amended) The apparatus according to Claim 1, wherein the case is a DVD case or CD case.

AMENDMENTS TO THE ABSTRACT

Please amend the Abstract as follows:

The present invention discloses a case with a vibration-activated light emitting indication apparatus comprising a case and a light emitting indication apparatus. The light emitting indication apparatus includes an indicator plate, which is transparent and contains a pattern, including, for example, a logo, characters, and drawings; an electroluminescent laminate; a power supply, which powers the electroluminescent laminate; a vibration sensor IC, which senses the vibration caused by an external act of pressing or shaking on the case, and then controls an inverter to activate the electroluminescent laminate. The above-mentioned case can be a container with a cover, such as a DVD case, a watch box, a jewelry box and any other cases. The pattern on the transparent indicator plate can be highlighted by the light emitted from the
